Clean the mounting surface free of dust and debris using a damp cloth. For metallic mounting surfaces, wipe clean with rubbing alcohol.

Remove backing from RibbonLyte and apply to the exposed side of double-sided tape.

Apply RibbonLyte by placing one end of the strip at the end of the double-sided tape inside the channel, then slide your finger along RibbonLyte to make firm contact with the tape.

Place a silicone pad over RibbonLyte every 12 inches. Mark surface with a pencil for all pilot holes to be drilled. NEVER cover an LED with a silicone pad.
Drill pilot holes at center of each mark.

Tighten the screws through the silicone pads until RibbonLyte is tightly secured.

Your RibbonLyte installation is now complete.
Clean the mounting surface free of dust and debris using a damp cloth. For metallic mounting surfaces, wipe clean with rubbing alcohol.

Remove backing from the zip tie pads.

Apply the zip tie pads directly over the double-sided tape on mounting surface, space approximately 12 inches apart.

Drill a hole through the center of each zip tie pad into the mounting surface where they are positioned.
5. Screw the zip tie pads into place with a size 8 counter sunk flathead screw.

6. Slide the zip ties through the openings in each of the zip tie pads. DO NOT connect ends of the zip ties.

7. Remove backing from RibbonLyte and apply to the exposed side of double-sided tape.

8. Apply the RibbonLyte by placing one end of the strip at the end of the double-sided tape, the slide your finger along RibbonLyte to make firm contact with the tape. RibbonLyte should rest over the zip tie pads.
Wrap the zip tie around RibbonLyte and slide the tail of the tie through the other end until it holds its position and has a snug fit.

Trim the excess zip tie with scissors or wire snips.

Your RibbonLyte installation is now complete.
